

Mobility in winter

Tips for driving coaches in winter conditions

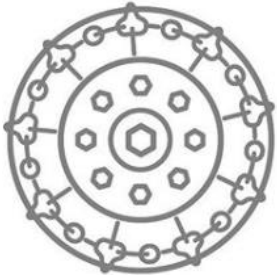

1 BUSES AND SNOW

PREVENTION

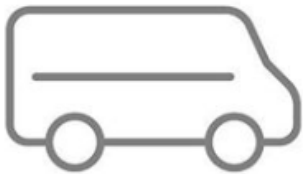

Before departure, review the route and weather forecasts. Adapt the trip based on the information obtained. The bus must have the appropriate special equipment (snow chains).

It is advisable not to drive buses with tow.

SNOW CHAINS

When the road is snowy, equip the bus with chains. Do not wait to find worse conditions to do it. Follow the directions of the competent administration.

DRIVERS

Bus drivers must know how to correctly place chains. This is part of their obligation, they are professional drivers.

They must also know the attachment points for towing the bus, if is necessary.

2 WEATHER FORECAST AND THE STATE OF THE ROADS

Check the state of the roads and weather forecast in the official web: www.meteo.ad, www.mobilitat.ad and www.dirso.fr/viabilitehivernale. You can follow the information live through, @MeteoAnd_OECC i @Mobilitat_AND.
